

Cybersecurity Update

League of Minnesota Cities

Legislative Commission on Cybersecurity
November 22, 2024

New State Law

Cybersecurity Incident Reporting

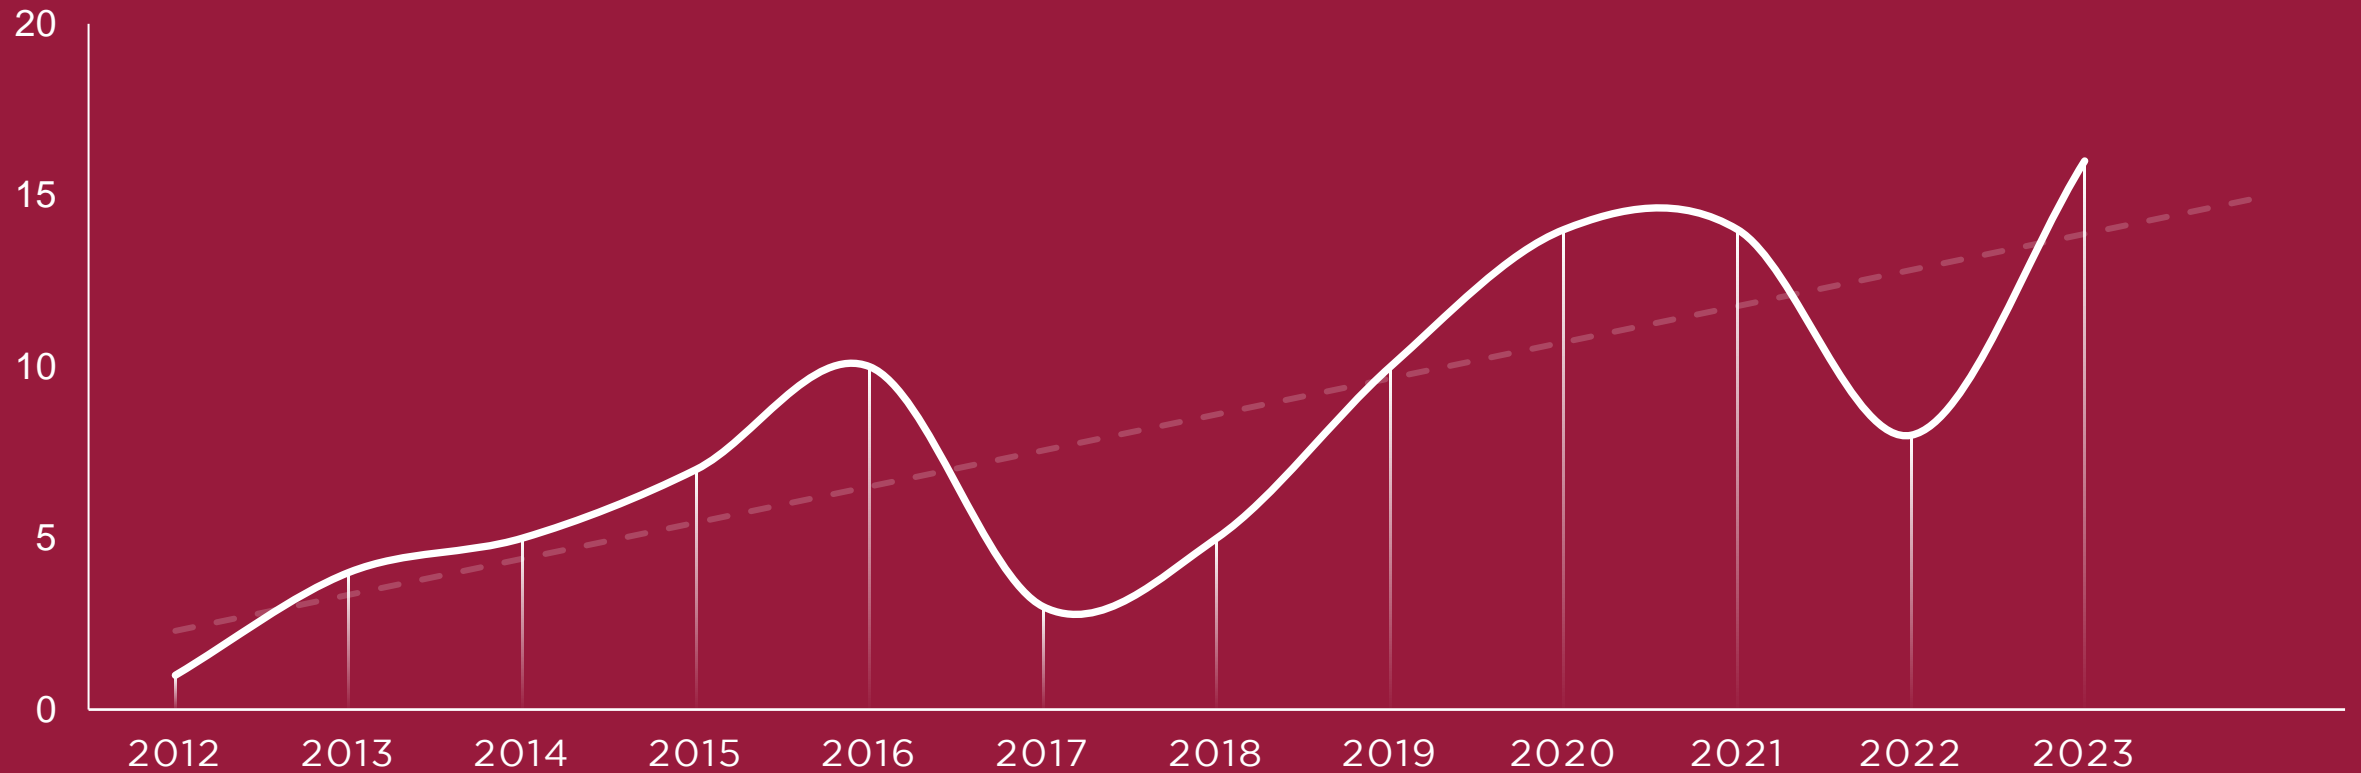

Beginning Dec 1st 2024, Cities must report cybersecurity incidents to the State.

LMC Interpretation

- Presently, some (potentially many) incidents go undetected/unreported.
- New reporting requirements will increase pressure to investigate and report.
- Reporting levels and incident totals will increase as government entities:
 - Become familiar with new reporting requirements.
 - Better understand what constitutes a reportable incident.
- In the future, the scope of the problem will be better understood with statewide monitoring data.

Claims Data

Cybersecurity Claims 2012 - 2023

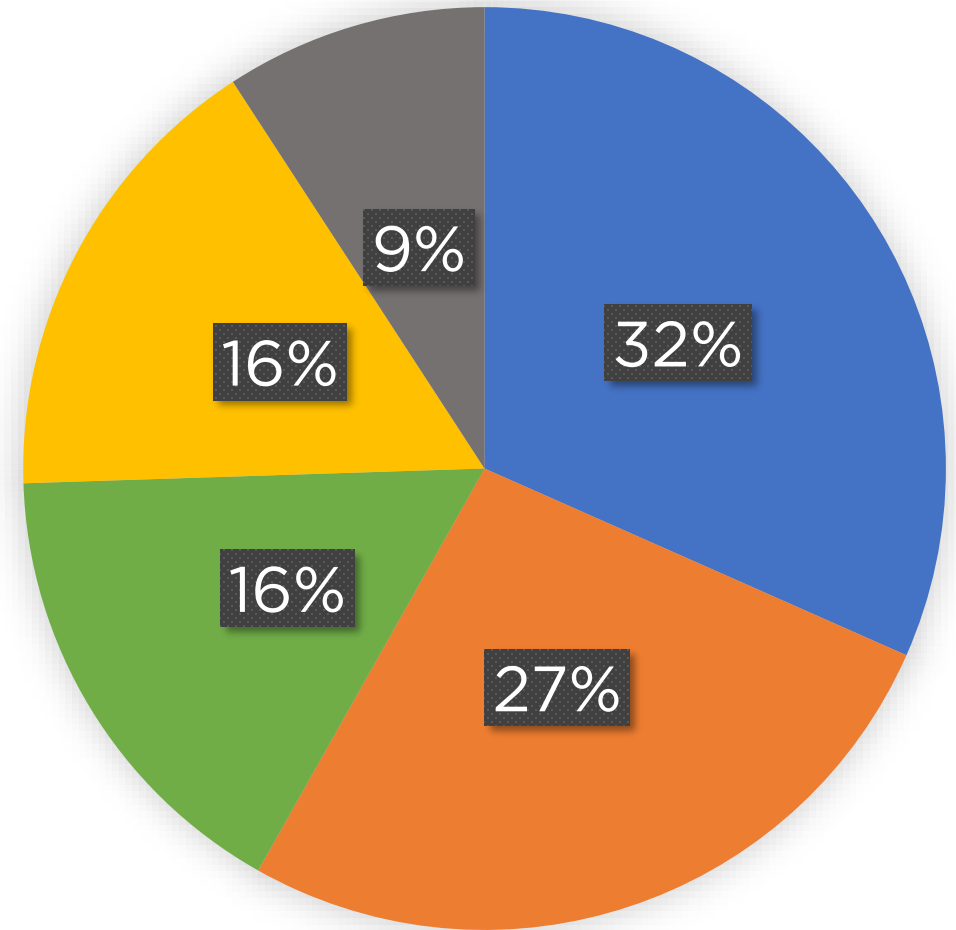

Claims Data

Cybersecurity Claim Types

- Data Breach
- Fraudulent Instruction
- Ransomware
- Unauthorized Access
- Uncategorized

Cybersecurity Maturity

Member Entities Lack Baseline Cybersecurity Controls

Cyber-Insurance Coverage Level	Meets Baseline Criteria	Does Not Meet Baseline Criteria
Standard Coverages (1015 Entities)	37%	63%
Enhanced Coverages (200 Entities)	62%	38%

Data from LMCIT renewal applications indicate that entities often lack one or more of eight baseline technical & administrative controls.

State Cybersecurity Grant Program

Improving Local Government Cyber Posture

- **State supported grant program to provide \$25k-\$1M grants for under-resourced cities to increase baseline cyber posture**
- **Eligible expenditures include most common areas where cities lack including hardware, software, managed IT and email services etc.**
- **Make the State Whole-of-State Cybersecurity Plan go further**
